

I refuse to listen to constant commercials to wait for traffic reports every ten minutes, or in FM station where the traffic reports are announced when ever they feel. The only "Local" radio I listen to is WGN for the Cubs games, and that is it. Even then, I switch back to XM on commercial to listen to music. Local broadcasters should try to fix their problems, not bully congress to pass laws to protect their interests. This is a competitive world, and if you can not compete, then do not come out and play.
